

MULTI-FAMILY ORGANIC WASTE RECYCLING

Here are some key requirements to remember for ensuring compliance and success with your program.

Provide information to tenants about proper sorting of trash, recyclables, and organics at least annually.

Ensure tenants have access to an adequate number, size, and location of containers with appropriate labels and color.

Provide organic waste recycling information to new tenants before or within 14 days occupancy.

Disallow tenants from placing organic waste in a container not designated to receive organic waste to avoid contamination fees.

Ensure collection containers are kept secure to prevent scavenging and theft.

Designate someone to periodically monitor waste activities to help avoid code violations.

& RECYCLING

RESOURCES FOR OWNERS, MANAGERS, AND TENANTS

The City and Burrtec are here to help you!

We can provide downloadable recycling guides for distribution to tenants.

We can provide downloadable posters to be placed in visible areas at your property.

We can provide waste needs assessments to determine adjustments in service levels which could potentially save you money!

We can provide ongoing technical and educational assistance. Contact 760.255.5126 or email jreed@barstowca.org.

Follow Barstow Recycles on Facebook or sign up to receive emails with news and updates about recycling programs and events.
